

People who help you move forward.

Maya Chen

Your relationship & growth plan / October 1, 2026

YOUR BOARD AT A GLANCE

Mentors Perspective & wisdom	01
Coaches Skills & accountability	01
Connectors Relationships & opportunity	01
Sponsors Advocacy & advancement	00
Peers Shared learning & support	02

A working plan, built around you.

Use this report to prepare for conversations, make thoughtful asks, and revisit the relationships that support your goals.

Your direction

What you are working toward - and what you already bring.

GOALS & VISION

2-3 years

Stop feeling like I'm faking it. Be able to architect systems, not just implement features. Lead technical decisions with confidence.

STRATEGY & PROGRESS

What does 'senior' even mean? Technical depth? Leadership? Years of experience? Everyone has different definitions.

1 year

Decide between: EdTech specialist, accessibility expert, or full-stack generalist. Build recognized expertise in SOMETHING.

STRATEGY & PROGRESS

Feel pulled in too many directions. Love EdTech mission but accessibility might have more impact. Or should I just focus on becoming a really solid full-stack dev first?

6 months

Create something that combines teaching and tech. Maybe a platform for career changers? Or accessibility learning tool?

STRATEGY & PROGRESS

Have 5 half-finished projects. Need to FOCUS and actually ship something.

Strengths to build on

The capabilities and experiences you bring to every relationship.

Cross-functional Communication

Translate complex technical concepts into plain English. Former teacher - can explain React hooks to a 5-year-old or a CEO.

EXAMPLES & NOTES

This came from teaching 4th grade for 5 years. Maybe I should lean into this more?

Learning Velocity

Went from HTML/CSS to deploying production React apps in 6 months. Currently learning AWS and system design through building.

EXAMPLES & NOTES

Is this really a superpower or just survival mode? Everyone expects me to know everything already.

User Empathy

Instinctively catch UX issues others miss. Always thinking about accessibility and diverse user needs.

EXAMPLES & NOTES

This feels natural from teaching special needs students. Could this be my niche?

Debug Persistence

Will hunt bugs for hours. Actually enjoy the detective work. Good at systematic elimination and asking the right questions.

EXAMPLES & NOTES

Spent 14 hours tracking down a race condition last week. Is this normal? Senior devs seem impressed but also concerned.

Your people

A complete directory of your board and the value you exchange.

MENTORS / PERSPECTIVE & WISDOM

James Rodriguez

ROLE

Staff Engineer at my company

MEETING CADENCE

Not set

NOTES

Super helpful but busy. Don't want to bother him too much. Should I ask him to be formal mentor?

COACHES / SKILLS & ACCOUNTABILITY

Bootcamp Career Counselor (Lisa)

ROLE

Career Services at DevBootcamp

MEETING CADENCE

Not set

NOTES

Still free for alumni but advice feels generic now. Need more technical career guidance.

CONNECTORS / RELATIONSHIPS & OPPORTUNITY

Marcus Thompson**ROLE**

Organizes Austin React Meetup

MEETING CADENCE

Not set

NOTES

Super welcoming to newcomers. Keeps inviting me to speak but I'm terrified. Maybe next year?

PEERS / SHARED LEARNING & SUPPORT

Alex Park**ROLE**

Another bootcamp grad, 6 months ahead of me

MEETING CADENCE

Not set

NOTES

My debugging buddy and confidence booster. We promised to pull each other up as we grow.

Priya Patel**ROLE**

Junior Dev at competing startup

MEETING CADENCE

Not set

NOTES

She's growing faster than me technically. Motivating but also intimidating.

Stay connected

A practical rhythm for keeping your relationships active.

FOR YOUR NEXT CONVERSATION

1. Share the goal you are working toward.
2. Bring one specific question or request.
3. Agree on a next step and a time to reconnect.

Board insights

AI-generated reflection to review alongside your own judgment.

Focus for the next quarter

This is illustrative sample analysis for design review.

Make each conversation purposeful

- Connect each meeting to one current goal.
- Ask for specific feedback on your next project.

Build a balanced board

Review the perspectives represented on your board and consider where another voice would help.
